

# Modo Portal: From Links to Action

Today's students and employees don't have time to navigate multiple systems, and most institutions manage more than one portal to support them.

Students are often mobile-first. Employees are often desktop-first. But behind the scenes, many campuses are juggling multiple portal experiences across departments, systems, and use cases.

Modo brings these experiences together into a single, connected platform, so you can eliminate duplication, simplify management, and deliver a clearer path forward for every user.

## Why Modo Is Easier, Not Harder

Most institutions are already managing complexity across multiple portals—often without realizing how much effort it creates. Different departments, systems, and audiences lead to duplicated content, inconsistent experiences, and ongoing work just to keep everything aligned.

Modo eliminates this complexity.

- Unify multiple portals into one platform.
- One source of truth. Connected experiences.
- No duplication. No disconnect.

## The Problem with Traditional Portals

Most institutions don't have a portal problem—they **have a multiple portal problem**.

Different portals for different systems, audiences, or departments create behind-the-scenes fragmentation and confusion for users. Even when each portal works, the overall experience doesn't.

**THE RESULT:** More portals. More duplication. More friction.

**Modo brings these experiences together by turning multiple portals into one system that helps people move forward.**

# THE SHIFT

Most portals organize access. Modo helps people take action.

## What Makes Modo Different

1

### From Links to Action

- See a hold → understand it → resolve it
- See a deadline → take the next step
- Find a service → complete the request

**⚡ One place. One step. Clear next action.**

2

### One Platform. One Portal. Any Device.

Students engage on mobile. Employees often rely on a desktop. Modo replaces multiple disconnected portals with a unified, full-featured experience that connects seamlessly to the mobile campus app.

- Desktop experience designed for employee workflows
- Mobile experience designed for in-the-moment student engagement
- One platform connecting both

**⚡ Connected, not duplicated.**

3

### Built for Every Role on Campus

- Students, prospective students, faculty, staff, advisors
- Personalized schedules, tasks, and resources
- Dynamic, real-time content

Each audience gets an experience designed for how they work, whether mobile or desktop.

**⚡ The right experience for each user, in the moment they need it.**

4

### Integrations That Actually Do Something

- SIS, HCM, and Finances (Banner, PeopleSoft, Workday)
- LMS (Canvas, Blackboard, Brightspace, Moodle)
- Advising, events, clubs, wayfinding

**⚡ Not just showing data, enabling action.**

5

### Built to Grow With You

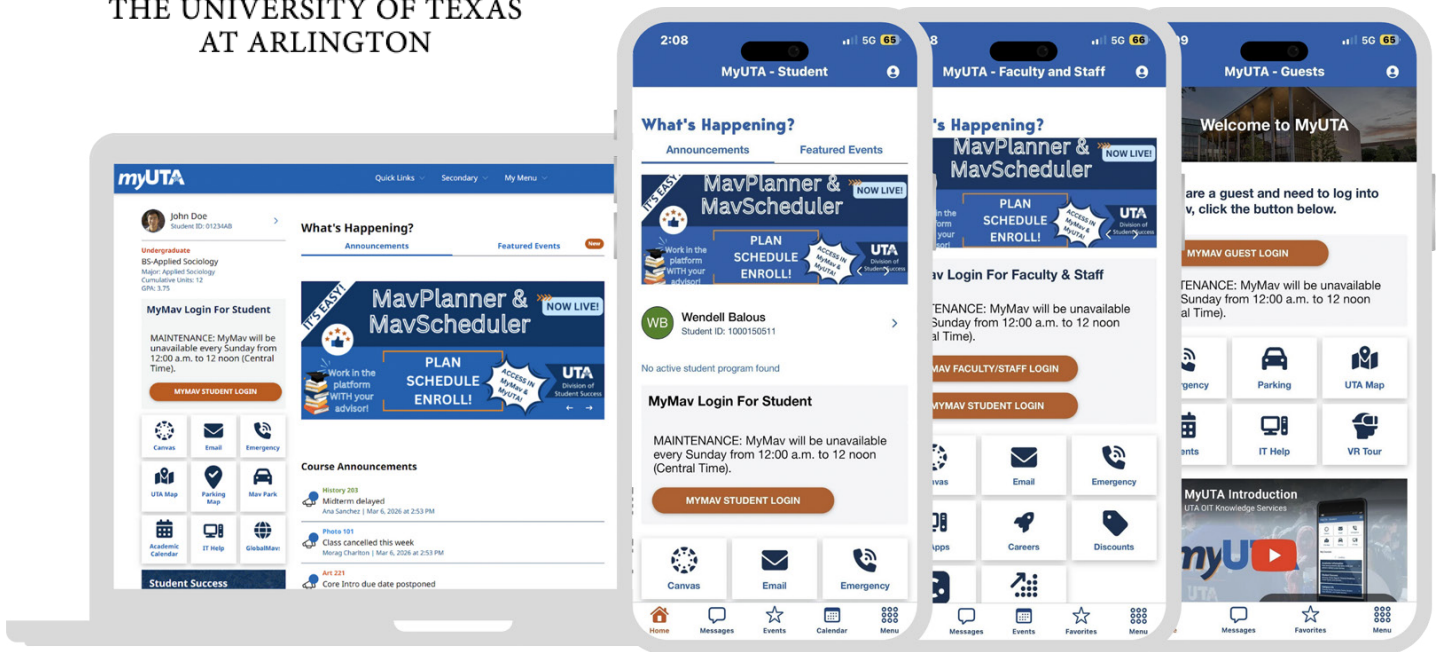

- No-code / low-code extensibility
- Build and update experiences with minimal IT support
- Add and evolve experiences in step with your campus
- Delegate updates across teams with governance

**⚡ Your team moves faster, without increasing complexity.**

THE UNIVERSITY OF TEXAS  
AT ARLINGTON

*UT Arlington drove campus engagement and improved freshman retention by 24% by unifying portal and mobile.*

## What This Means for Your Campus

When everything works together, campus feels easier. Modo connects mobile and desktop so students can act in the moment and employees can manage workflows in one unified portal, driving engagement and keeping everyone on track.

**BOTTOM LINE:** Most portals organize access. Modo helps your campus community move forward.

## Already a Modo Customer? Already managing multiple portals?

You already have the foundation for a powerful desktop portal.

See how Modo helps you consolidate and simplify, and how your peers are realizing the benefits of a unified, Modo-powered campus experience. [Let's book a demo!](#)
