

Transform Your Campus with TouchNet OneCard Mobile IDs and Modo Campus

A Leap into the Digital Future for Your Campus

In an era where technology defines our experiences, Modo and TouchNet unite to bring a revolutionary change to your campus. We introduce the future of campus identification—**TouchNet OneCard Mobile IDs**, seamlessly integrated into your **Modo-powered campus app**. This collaboration is set to redefine how students and faculty interact with your institution, fostering a digitally advanced, connected, and secure campus environment.

Embrace the Future with Digital Ease

NFC-Enabled IDs for All: Step into the world of convenience with NFC-enabled digital IDs compatible with Apple Wallet and Android devices. Your campus community can now access everything from building entry to meal plans with a simple phone tap.

Comprehensive ID Functions: Beyond basic identification, these digital IDs integrate seamlessly into daily campus life, offering access to health services, university transit, and more.

Fast Solution: Modo's no-code integration adds TouchNet OneCard Mobile IDs directly to Apple Wallet and Android apps, complete with your institution's branding. Students can also see important information like balances and emergency contacts with a tap.

Reduced Cost: This integration allows schools to lower the cost and time involved with ID card distribution, provide a more secure experience by digitally managing the lifecycle of cards directly on users' devices, and eliminate the environmental impact of deploying plastic cards.

Real-Time Access and Security: The digital IDs provide instant access to services and facilities and ensure heightened security and immediate information updates—a futuristic approach to campus safety and convenience.

CUSTOMER SPOTLIGHT

Northern Arizona University's Digital Leap: Elevating the Student Experience with Digital IDs

Northern Arizona University's journey with their digital JacksCard exemplifies the transformative power of going mobile. The adoption of mobile IDs led to a significant increase in app usage, linking students more closely to campus resources and services.

- Over 14,000 people (70% of users) at NAU have chosen mobile IDs over plastic cards, translating into saving over 150 lbs of plastic.
- 90% of the digital native freshman class have never used physical ID cards.

Unleash the Power of Mobile Integration

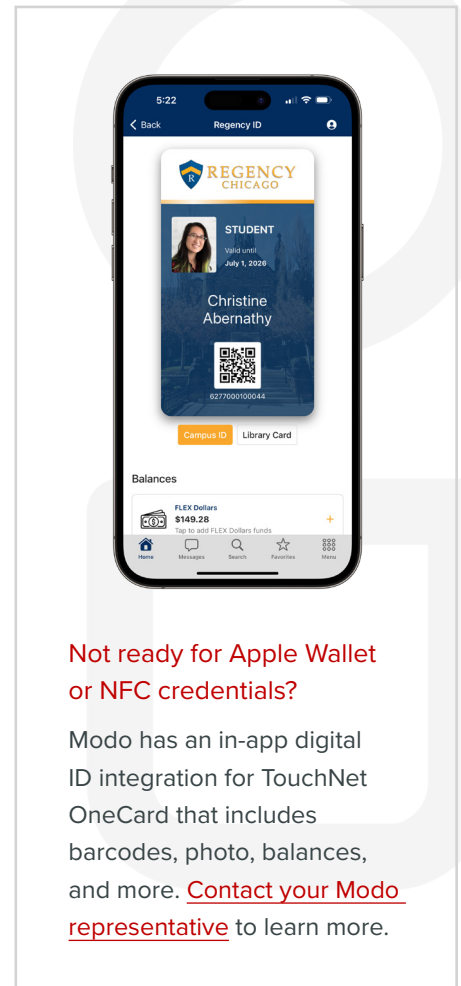

- **Easy Integration with Campus Systems:** Our no-code approach simplifies the integration of TouchNet OneCard Mobile IDs into your existing campus app. This means a smoother transition to a mobile platform with minimal disruption.
- **Branded Mobile IDs:** Reflect your institution's spirit with ID themes tailored for school branding and student affiliation—a personal touch to the mobile student experience.
- **Instant Access to Essential Services:** Everything is at your users' fingertips, giving them the features and information they need on the app and device they trust. This level of convenience and accessibility mirrors the significant user engagement seen at Northern Arizona University.

Transforming Campus with Tangible Benefits

- **Increased App Adoption Rates:** Northern Arizona University witnessed a near tripling in app sessions following the implementation of mobile IDs, showcasing the draw of digital integration.
- **Cost-Effective and Secure:** Reduce physical ID card distribution expenses and logistical challenges. Enjoy enhanced security with digital management of ID lifecycles directly on users' devices.
- **Environmentally Responsible:** Join the movement towards sustainability by eliminating the need for plastic ID cards.
